

# Managed Maintenance Programs from Grundfos

As Autumn approaches let Grundfos help you with the maintenance of your Grundfos Pumps at **Drain Down Time**

## Delivering a full maintenance service including:

- › Full inspection of the pump & motor
- › Identify the parts that require replacing
- › Refurbishment of the Grundfos pump
- › Performance test to ISO 9906:2013
- › 12-month warranty
- › Grundfos collection and delivery service
- › Site removal, installation, and commissioning

**GRUNDFOS** 

# Capability service solutions with nationwide support

Our Service Solutions delivery hub is based in Warrington, and our engineers are located geographically in the UK. We have over 40 trained and experienced Service Engineers with experience in pumps and controls, who all operate from fully equipped vans with appropriate PPE and tooling.

To support this programme, the following Service Management and operations delivery teams are fully committed and available.

- Customer - Sales Support
- Service Contracts and Framework
- Planning Team
- Workshop
- Quotations
- Service Administration
- Technical / Spare quotes
